Name Plate Sizing Chart

Use the following chart to determine the size of nameplates.

- Remember to include a minimum of 0.3 inches for margins.
- NES is glad to size plates, as requested

Engraving characters are defined by height in fractions of inches. Characters in PC document applications are defined by height in points. A point is equal to 1/72 of an inch. So a 1/4 inch engraving letter is equivalent, in height, to an 18 point PC letter.
